

## BACKING

## ALERT = SAFETY

- Start in the proper position.
- Inspect your intended path.
- Avoid blindside backing whenever possible.
- Turn on four-way flashers.
- Sound horn.
- Check both mirrors and the front of the tractor constantly.

- Back ONLY when necessary.
- Back slowly. Do not accelerate.
- If the trailer gets out of position, pull forward and start over.
- Never be in doubt about clearance, get out and look.

Avoid lengthy backing, giving too much room invites others to pull behind you.

It is the driver's responsibility to assure a safe and uneventful backing maneuver.
